IT IS CRITICAL THAT WE GET AN ACCURATE ASSESSMENT OF POWER NEEDS FROM EACH EXHIBITOR AHEAD OF TIME SO THAT WE CAN PLAN OUR POWER GRID ACCORDINGLY.

STANDARD 120V POWER CAN BE ORDERED...
20 AMPS (FOR POWER NEEDS UP TO 20 AMPS)
OR MULTIPLES OF 20 AMPS (FOR ANY POWER REQUIREMENTS IN EXCESS OF 20 AMPS)

Power is delivered to booths via cables and outlet boxes... each outlet box contains two duplex outlets (like the outlets in the walls of your home or office) and will accommodate a maximum of 20 Amps.

PLEASE USE THE TABLE WITH STANDARD AMPERAGES AND PRICING INFORMATION ON THE REVERSE SIDE OF THIS WORKSHEET TO CALCULATE YOUR ELECTRICAL REQUIREMENTS AND RESULTING COSTS.

IMPORTANT

CIRCUIT BREAKERS  Power consumption is controlled by circuit breakers. If the desired amperage you give us is incorrect, circuit breakers will trip, affecting your booth, and sometimes also affecting power to neighboring booths. To remedy the tripped circuit breakers, you will have to unplug equipment to get your total power load under what is supplied, or you will have to order additional power on site. Depending on the booth location, additional power may not be possible. IF power can be added, the charge for an on-site change will be TWICE the normal rate for the power added, because of the additional labor to distribute power around booths already set up. Planning ahead can avoid annoying and non-productive downtime in addition to costly change orders.

POWER STRIPS  Plugging power strips into the duplex box does NOT mean you have more power... only the capability to plug in more devices to the same originally allocated power. If you need more sockets than what can be accommodated by the duplex box with the appropriate number of power strips, YOU MUST ORDER MORE POWER.

GFCI PROTECTION  All 120 Volt outlets are GFCI (Ground Fault Circuit Interrupter) protected, as required by Code. If your equipment trips the GFCI, it means there is a fault in your equipment. We CANNOT disable the built-in protection, nor can we fix your equipment. We strongly suggest that you test your equipment on a GFCI outlet ahead of time.

EXTENSION CORDS  Power will be delivered to the outlet box(es) in your booth. Distribution within the booth is your responsibility, as well as making sure your equipment is in good working order. Please bring the appropriate extension cords and any materials to tape or mat down your cords and cables to avoid creating trip hazards within you booth.

DO NOT PILE PACKING OR OTHER MATERIALS ON TOP OF POWER BOXES... THIS CAN CAUSE OVERHEATING, AND EXTREME DANGER OF FIRE!!
